## Objective

---

Aspiring Software Engineer with a strong foundation in Data Structures and Algorithms, OOP, and DBMS. Proficient in Python and SQL, with experience developing interactive applications and AI-driven projects. Seeking a software engineering opportunity to build efficient, scalable solutions and contribute to impactful products.

## Education

---

|                                                       |           |
|-------------------------------------------------------|-----------|
| <b>Pranveer Singh Institute of Technology, Kanpur</b> | 2023–2027 |
| B.Tech in Artificial Intelligence and Data Science    | CGPA: 8.1 |

|                                                      |        |
|------------------------------------------------------|--------|
| <b>Mother Teresa Higher Secondary School, Kanpur</b> |        |
| Class XII (Science)                                  | 77.5%  |
| Class X                                              | 82.17% |

## Technical Skills

---

- **Languages:** Python, Java, C, SQL
- **Core Concepts:** Data Structures & Algorithms, OOP, DBMS, REST APIs, Unit Testing, Cloud Fundamentals
- **Frameworks/Libraries:** Flask, Streamlit, LangChain, OpenCV, MediaPipe
- **Databases:** PostgreSQL, MySQL
- **Tools:** Git, GitHub, VS Code, PyCharm
- **AI Tools:** ChatGPT, GitHub Copilot
- **Web Technologies:** HTML, CSS

## Projects

---

### IntelliQuiz – Quiz Platform — Python, Flask, PostgreSQL, HTML, CSS

- Developed backend logic for quiz management, user authentication, and score tracking using Flask.
- Designed a PostgreSQL database and implemented performance analytics to monitor user progress.

### AI Chat Assistant — Python, Streamlit, LangChain, Groq (LLM API)

- Developed an LLM-powered chatbot with real-time, context-aware responses
- Designed multi-session chat system with memory and prompt engineering

### Gesture Air Mouse — Python, OpenCV, MediaPipe

- Built a real-time gesture recognition system to control cursor, clicks, scrolling, and system functions
- Implemented hand tracking, smoothing, and gesture control for seamless human-computer interaction

### Smart Eye – Attendance System with Emotion Detection — Python, OpenCV, Flask

- Developing a facial recognition-based attendance system with real-time emotion detection capabilities
- Implementing modules for face detection, data preprocessing, and attendance tracking

## Achievements

---

- Solved **700+** problems on **LeetCode** with a **500-day coding streak**.
- Earned **20+** **LeetCode** badges, including monthly and annual awards.
- Achieved **6-star** in **Problem Solving** and **5-star** in **Python and C** on HackerRank.

## Publications

---

Co-authored: *A Comparative Study of Sentiment Analysis Models for WhatsApp Chat Evaluation* (IJERT, 2026)  
DOI: <https://doi.org/10.5281/zenodo.19110585>

## Coding Profiles

---
